

Script For Group 1's Presentation

Take a deep breath - We got this

Important Terms

- **Pop-up:** The first little info slide when transitioning to a new topic
- **Pokemon pop-up:** The second info slide that has the gif of the pokemon with it

Introduction: Jack

- Welcome everyone to the presentation and talk about title

Meet the Team: All

- Give brief hello in the following order: (Just say “hello im ____”)
 - Jack
 - Collin
 - Brian
 - Tyler
- Jack will then go over the various job titles when they pop up
- Jack will briefly introduce the next slide set: “continuing on our journey we’ll arrive at the technology we used.”

Technology: Collin

- Collin will say something similar to (or exactly) “We used a variety of technologies to create our Pokémon Manger, looks like one of our friends wants to tell you about it!”
- Slide will pan over to a pokemon: Collin will then list when it is contained in the text boxes.
- Collin will lastly introduce the positive and negative slide set “Next up we have our positives and negatives” — again you don't have to say exactly this but just make sure to introduce the slides

Positives and Negatives: Jack

- Jack will speak when the pop-up appears and wait until the pokemon pop-up to speak again
- Talk about the different positives and negatives the group had
- Introduce the use case diagram

Use Case Diagram: Jack

- Wait for pop-up to appear (THIS IS THE WONKY SLIDE, ONLY CLICK ONCE FOR TRANSITION) then speak on the use case diagram
- Pokemon pop-up will appear, read directly from it
- Introduce the Entity Relationship Diagram

Entity Relationship Diagram: Tyler

- Wait for the pop-up to appear, talk about the ERD
- It looks like a spaghetti monster but basically just follow this outline
 - User class - Note all the information it takes in (top part) and all the functions (bottom part)
 - AddContact class - same as user class but note the different functions
 - Contact class - coming from the AddContact class, it takes in the added contacts and any other necessary info
 - Search class - coming from AddContact class, it allows for the search of the added contact
 - Database class - stores all the other classes
- Wait for the pokemon pop-up, read it 1 for 1 or something along the lines of what it says
- Introduce the GANTT chart “Next up we have our GANTT chart”

GANTT Chart: Brian

- Wait for it to pop up
- Talk about the different colors and how we used it to organize things, basically just how we practiced
- Wait for the pokemon pop-up
- Read it 1 for 1 or something similar to it is fine
- Introduce the Demonstrations slide

DEMOS: Brian and Collin

- Brian will go first with the API demo (we should already have it up)
- Collin will then navigate to the website (should also already be opened) and go through the different talking points on the sheet that will be on the lectern
- Return to the slides (press alt+tab and it should stay in presentation mode)

Questions: Jack - might defect questions to other members

- I highly doubt there will be any meaningful questions
 - If there are, be ready to answer if it is in your area of expertise
 - Jack - Presentation materials, PM stuff or Charts
 - Tyler - database stuff
 - Collin - Front End stuff
 - Brian - Back End stuff
